Sustainability - the basis for CLASSEN's corporate philosophy & strategy

As a medium-sized family business, we think in closed cycles; the sustainable and responsible use of resources is a matter of course for us - from the procurement of raw materials to production and recycling. Our nearly 2,000 employees and management team live this philosophy in appreciation of our planet. Since 1962, constant knowledge of what consumers want has brought the CLASSEN Group to where the company is today. Our innovations include not only numerous patents as an expression of our innovative spirit, but above all continuous further development for a long-lasting and sustainable future.

01. WHAT IS CERAMIN?

CERAMIN is an unique, patented technology.

CERAMIN is the natural material that makes the respective end products, such as synthetic flooring, something special. **Healthy to live** with and carefree to use.

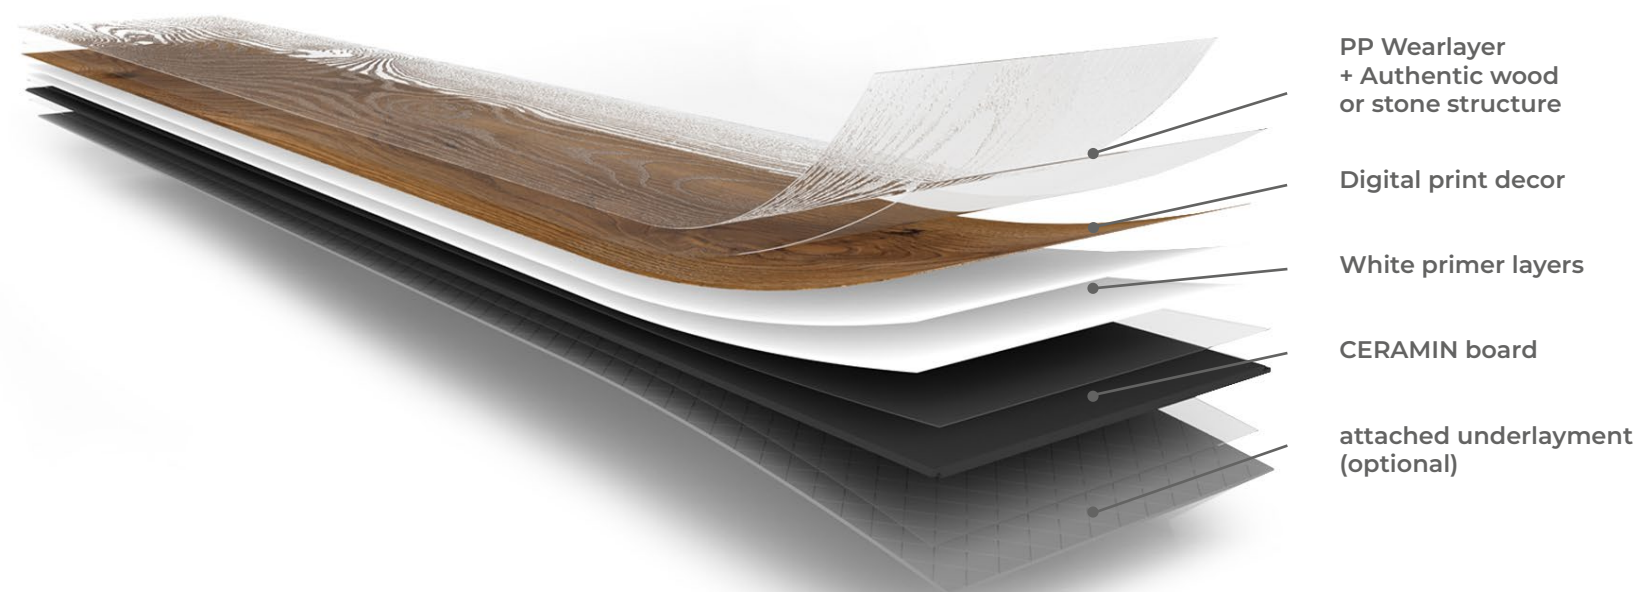

As the heart of robust, durable polymer products **without PVC**. As a natural, pollutant-free material for long-lasting health. As the only market-ready alternative „Made in Germany” that already makes, for example, 100 % recyclable polymer floors and does not burden the environment and the future of our children.

The floor boards are dimensionally stable, robust, 100% waterproof, UV-resistant, easy to clean and simple and safe to install thanks to the quick installation systems.

FUTURE. NOW.

- 100% waterproof material
- PVC and pollutant free
- 100% recyclable
- made with recycled materials
- no smell
- kids and pets friendly
- acoustic comfort
- healthy for living
- robust
- durable
- UV-resistant
- floor heating friendly
- quick installation
- warm when touched

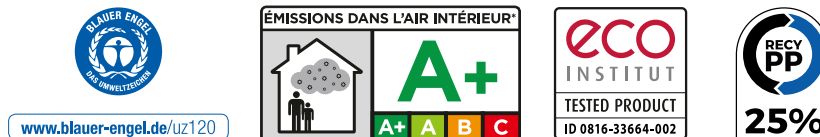

RECYCLING STRATEGY

Produced from recycled material

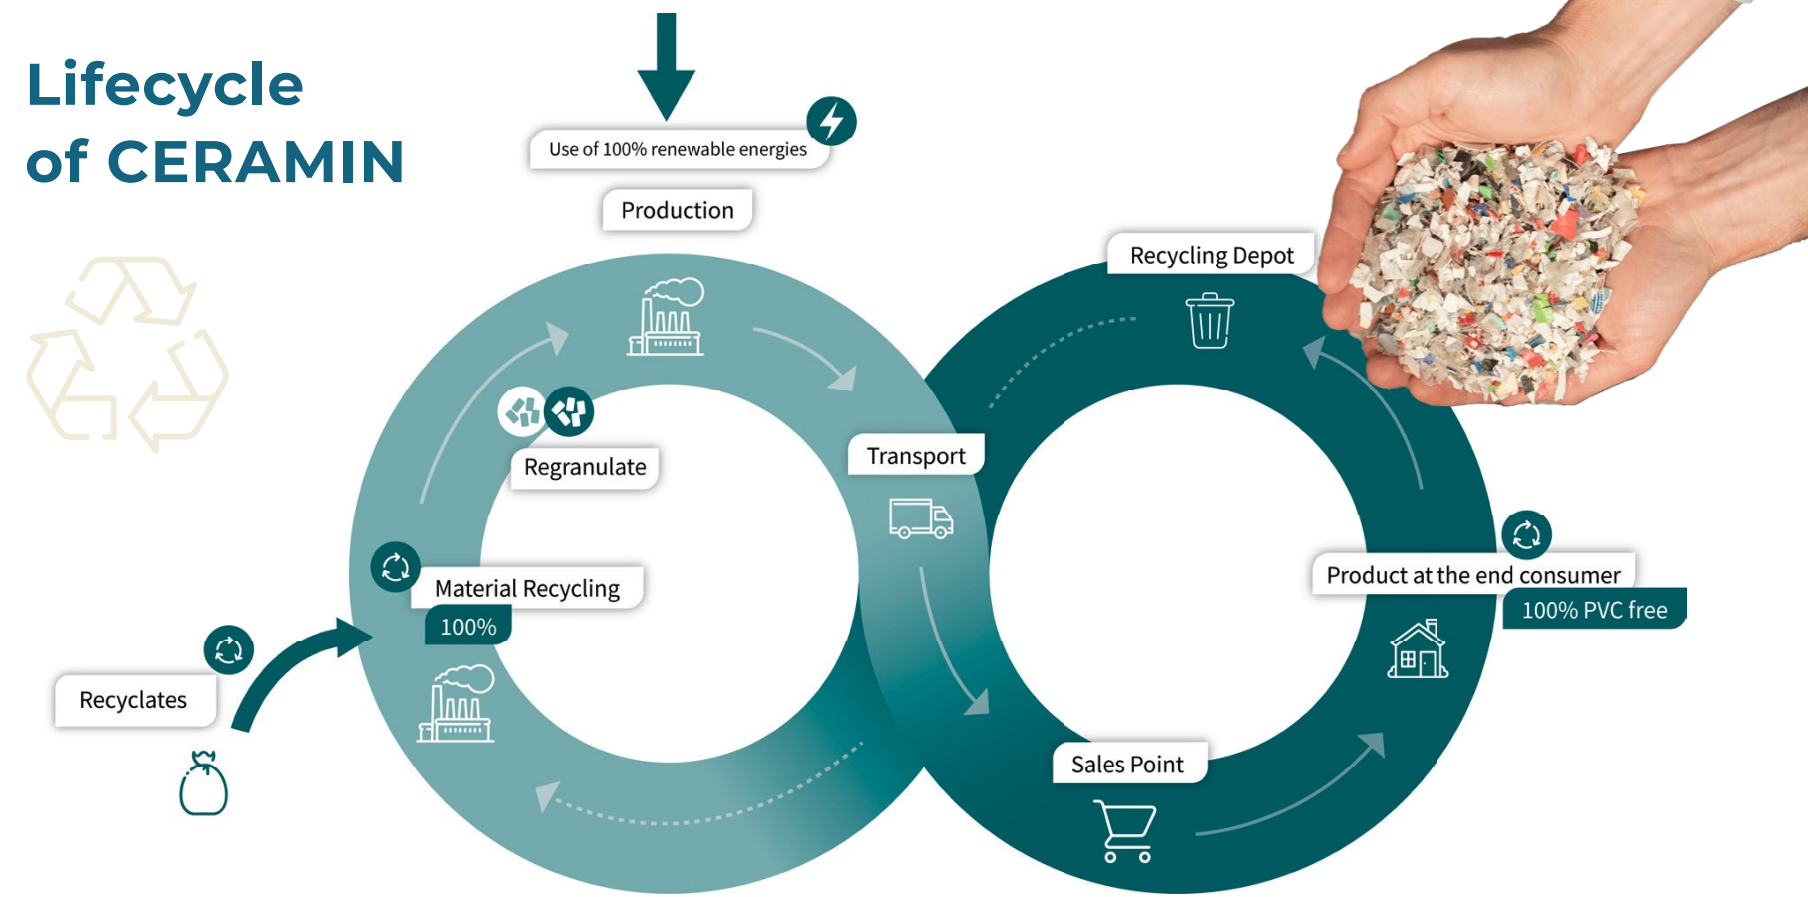

- For CERAMIN-based polymer floors, the recycled share of the total product is at least 25%
- The PP recyclates take up minimum 65% of the polymer share
- Through the use in CERAMIN, there is a so-called upcycling of the recycled material into a high-quality product with a long life

100% recyclable

- The independent network for the plastics recycling plastship GmbH has tested CERAMIN for its recyclability and certifies it as a very recyclable
- CLASSEN actively participates in the circular economy / Joint Venture Hündgen (HC Plastic)
- CERAMIN products from CLASSEN meet the requirements of the label of the Eco Institute and the environmental seal "Blauer Engel" of the German Federal Government, which is awarded only to wall and floor coverings without PVC.

Lifecycle of CERAMIN

Our strategy: **Today's components are tomorrow's raw materials**

Polypropylene instead of PVC

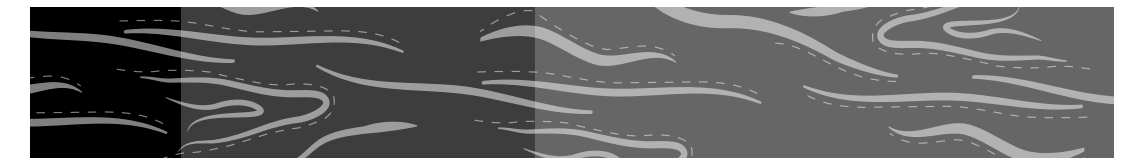

A more sustainable material for durable floor and wall coverings

- No harm to health
- No smell, no toxicity to human body
- 100% recyclable
- 25% lighter than PVC flooring.

a CERAMIN floor

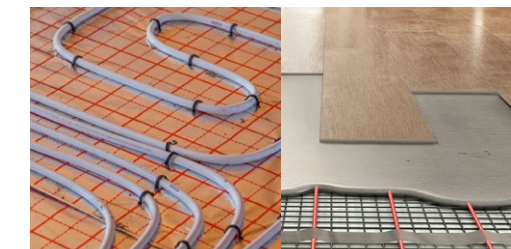

easyloc

- Angle-Angle Profile
- patented CLASSEN solution
- under 4.5 mm

Base

You can install the CERAMIN with use underlay by clicking on it or gluing it to the screed floor.

Underfloor heating

Friendly to warm water and electric underfloor heating systems. The surface temperature must not exceed 29°C.

Easy cut

Need to cut the plank? Use a cutter knife!
Need to make a hole? Use a compass!
Quickly and without dust.

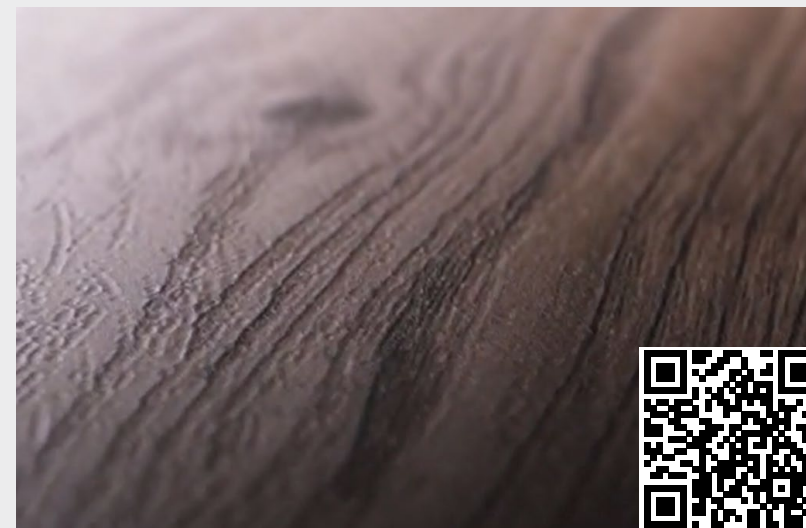

100% WATERPROOF

The 100% waterproof core is a reliable and proven protection against the effects of water, is waterproof and cannot swell. Thus, products with CERAMIN are ideally suited for daily wear, wet cleaning and even for installation in wet rooms.
