HERRINGBONE

EASY INSTALLATION

A-A PLANK TECHNOLOGY

While previously double storage or complicated ordering of A-B packages was necessary or there was a risk of possible confusion of the planks during installation, megaloc twin - the further development of the already well-known megaloc installation system - ensures real installation convenience and fast progress during installation.

twin

Only A-planks are used at VILLE, A- and B-planks are no longer required. This makes installation uncomplicated and also optimises the waste.

HERRINGBONE INSTALLATION

Installing Ville is as easy as can be. Thanks to the fold-down technique, the planks are installed as a floating click system. The planks are simply joined together at a 20 to 30 degree angle on the long sides and a light pressure with the thumb on the short side locks the secure connection of the planks.

Unpleasant and annoying creaking, which is familiar from classic herringbone planks, is also a thing of the past. With the detailed installation instructions, you will succeed in installing the floor easily and quickly.
